### Grad Student-itis

August 2019  
eleanorglewe.com

Basically, grad school is detrimental to your physical and mental health. But it might still be worth it!

Eye twitches

Petechiae  
a.k.a. blood spot things

Pulsatile tinnitus

Nobody tells you that grad school will make you sick. Here is a non-exhaustive list of the (not so) weird ailments I experienced:

Myopia  
First glasses at 25!

Panic attack

In the middle of the night, with a prospective sleeping on the living room couch

Wisdom tooth incoming!

See also: Getting wisdom teeth out!  
(Mopey Chipmunk Vols. 1+2)

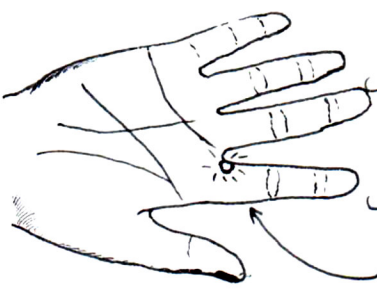

Ache and sloshiness above upper teeth

Manifests when walking

Self-diagnosis: Some kind of seasonal allergy

Ganglion cyst

It went away eventually...

Doesn't show up on an X-ray  
all by itself!
